Skills

Communication Skills

Critical thinking and problem solving

Ability to Multitask

Effective Time Managment

Programming Languages: Java, SQL, Python
Cybersecurity: Network security, Vulnerability assessment, Threat modeling
AI/ML Tools: AWS, Jupyter Notebooks
Data Engineering: Data warehousing, Version Control: Git, GitHub

As a recent graduate with a strong academic background and internship experience, I am eager to kickstart my career in Software Engineer. Possessing excellent problem-solving skills, adaptability, and a passion for learning, I am ready to contribute my skills and knowledge to drive growth and success for your organization. With a strong work ethic and dedication to personal and professional development, I am confident in my ability to excel in any role.

Education

Bachelor of Engineering

Rajeev Gandhi Memorial College Of Engineering and Technology / 12/2021 - Present
Nandyal

Certifications:

- Cyber Security by Edu Skills
- JavaScript by IBM Skills Build
- Cybersecurity Essentials by CISCO Networking Academy
- AI-ML by AWS
- Data Engineering by AWS

Projects

Credit Card Fraud Detection

06/2024 - 09/2024
Nandyal

Description:

- Developed a machine learning model to identify fraudulent credit card transactions using a dataset of anonymized features.
- Conducted **Exploratory Data Analysis (EDA)** to uncover transaction patterns and performed **feature engineering** to improve model accuracy.
- Evaluated models using metrics like **Accuracy, Precision, Recall**, and **F1-score**, achieving a high fraud detection rate and minimizing false positives.
- Deployed the final model using **Flask API** for real-time fraud detection simulation.

Technologies Used: Python, Machine Learning, DBMS, HTML and CSS.

KEYWORDS EXTRACTION

01/2024 - 03/2024
Nandyal

Description:

- Developed a Python program using natural language processing (NLP) techniques to extract keywords from large text datasets.
- Preprocessed text data using techniques like tokenization, stop-word removal, and stemming to improve extraction accuracy.
- Analyzed and visualized the importance of keywords to provide insights into key themes within the text.
- Tested and validated the program on diverse datasets to ensure robustness and efficiency.

Technologies Used: Python, NLP libraries, Data Preprocessing, Text Analysis.
